Preamble

Fisheries and Aquaculture are now a days important domain and getting momentum in increasing the Research and Training. They contribute significantly in developing employments and augmenting the livelihoods in the society. Employment opportunities can be created by offering training to the people to develop their skill in particular sector or area where more manpower is required. Creation or provision of jobs can only be possible by conducting various skill development programmes which motivates the people to become entrepreneur.

Graduates in fisheries and allied subject should be encouraged to involve in establishing their own enterprise in their concerned subject of knowledge. In general, the graduates do not come forward to start their own enterprise because of lack of confidence and knowledge in the subject studied, poor industrial relation or finance. These can be overcome by providing short term training on the subject concerned, preparation of projects, business management strategies.

In view of these, National Fisheries Development Board (NFDB) in collaboration with National Institute of Agricultural Extension Management (MANAGE) and technical partnership with Dr, Rajendra Prasad Central Agricultural University, Pusa, organizes a programme on “Aqua clinics & Aquapreneurship Development Programme”.

Objectives of the programme

- To establish Aqua One Centres (AOCs)
- To provide advisory and technical consultancy services.
- To create an awareness on importance of new and innovative technologies.
- To educate them to aware Govt. subsidiary schemes.
- To provide One Stop Solutions for Aqua farmers through AOCs.
